| Project Name  | SB Works         |
| Maximum Marks |                  |

## Project Overview

- Project Name: SB Works
- Description: A MERN stack freelancing platform that connects clients with skilled freelancers. It features project posting, a bidding system, an integrated chat for collaboration, a secure admin dashboard for oversight, and a streamlined workflow for project submission and review.
- Project Version: v1.0.0
- Testing Period: 2025-10-11 to 2025-10-18

## Testing Scope

The scope of this UAT includes the following core functionalities:

- User registration and login for all roles (Freelancer, Client, Admin)
- Freelancer and Client profile creation and management
- Client ability to post new projects
- Freelancer ability to view and apply for projects (bidding)
- Integrated chat system for communication between Client and Freelancer
- Admin dashboard for managing users and projects
- Search and filter functionalities for projects
- Project status updates (e.g., Available, Working, Completed)

## Requirements to be Tested

- As a freelancer, I want to find projects and submit my work easily.
- As a client, I want to post projects and hire the right freelancers.
- As a user, I want my login and personal information to be secure.
- As an admin, I want to oversee platform activity and ensure its integrity.

## Testing Environment

- URL: http://localhost:3000
- Credentials:

- Freelancer: freelancer@test.com / password123
- Client: client@test.com / password123
- Admin: admin@test.com / adminpass

#### Test Cases:

| Test Case ID | Test Scenario                    | Test Steps                                                                                                                                                                | Expected Result                                                                                                                                         |
|--------------|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC-001       | User Registration (Freelancer)   | 1. Navigate to the site.2. Click "Sign In" then "Register".3. Fill the form with freelancer details and submit.                                                           | The user account is created successfully, and the user is redirected to the Freelancer dashboard.                                                       |
| TC-002       | Post a New Project (Client)      | 1. Log in as a Client.2. Navigate to the "New Project" page.3. Fill out the project details (title, description, budget, skills) and submit.                              | The new project is created and appears on the "All Projects" page for freelancers to view.                                                              |
| TC-003       | Apply for a Project (Freelancer) | 1. Log in as a Freelancer.2. Go to the "All Projects" page.3. Select a project and click to view details.4. Enter a proposal and bid amount, then submit the application. | The application is successfully submitted and appears in the freelancer's "My Applications" list and the client's "Applications" view for that project. |

#### Bug Tracking:

| Bug ID | Bug Description                          | Steps to Reproduce                                                                              | Severity | Status | Additional Feedback                                                            |
|--------|------------------------------------------|-------------------------------------------------------------------------------------------------|----------|--------|--------------------------------------------------------------------------------|
| BG-001 | Chat messages do not appear in real-time | 1. Client and Freelancer log in.2. Navigate to a shared project page.3. Client sends a message. | Medium   | Open   | The freelancer has to refresh the page to see the new message from the client. |
