Proposed Solution for Freelance Finder

S. No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Clients struggle to efficiently connect with skilled and reliable freelancers, while freelancers need a transparent and secure platform to find genuine opportunities and showcase their skills. The core problem is the lack of a trustworthy, centralized platform that streamlines the entire workflow from hiring to project completion with integrity.
2	Idea / Solution Description	SB Works is a full-stack MERN freelancing application that connects clients and freelancers. Clients can post projects, review freelancer profiles, and select the best candidate. Freelancers can bid on projects based on their expertise. The platform facilitates direct communication and collaboration, with a dedicated admin team ensuring the integrity and security of every transaction.
3	Novelty / Uniqueness	- Dedicated Admin Oversight: Ensures integrity, security, and quality of freelancers.- Integrated Workflow: Streamlines the entire process from bidding to submission and feedback in a single interface.- Real-time Updates: Users receive real-time notifications about new projects and industry trends.
4	Social Impact / Customer Satisfaction	- Empowers clients with access to reliable and skilled freelancers.- Enables freelancers to find opportunities where their skills are recognized and valued.- Fosters a positive and productive working relationship in a secure, transparent, and dynamic environment.
5	Business Model (Revenue Model)	The project documentation focuses on functional and technical aspects. It does not specify a revenue model. The primary goal is to efficiently connect clients with freelancers in a secure environment.
6	Scalability of the Solution	The technical architecture is built for scalability: uses MongoDB for efficient data storage, Node.js backend for scalable network applications, and an overall client-server model that supports growth.
