

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	11-10-2025
Team ID	SWUID20250177148
Project Name	SB Works
Maximum Marks	4 Marks

Functional Requirements

These are the specific actions the SB Works platform must be able to perform.

FR No.	Functional Requirement (Epic)	Sub-Requirement (Story / Sub-Task)
FR-1	User Management	- Register as a Client, Freelancer, or Admin.- Log in and log out securely.
FR-2	Project & Profile Workflow	- Clients: Post new projects with details like description, budget, and required skills.- Clients: Review freelancer profiles and past work before hiring.- Freelancers: Browse and filter all available projects.- Freelancers: Update their profile with skills and a description.
FR-3	Application & Bidding System	- Freelancers: Seamlessly bid on projects that match their expertise.- Clients: View all applications for their posted projects.- Clients: Select and hire the perfect freelancer for their project.
FR-4	Collaboration & Submission	- Users: Communicate and collaborate in real-time using the integrated chat system.- Freelancers: Submit completed project work directly through the platform.- Clients: Review submitted work and provide feedback.
FR-5	Admin Oversight	- Admins: Monitor and ensure the integrity and security of all platform data and transactions.- Admins: Manage users and projects from a central dashboard.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The platform must have a clean, intuitive, and user-friendly interface for all user types (Clients, Freelancers, and Admins).
NFR-2	Security	The system must be secure, with a dedicated admin team ensuring the integrity of every transaction and user data. All sensitive data like passwords must be encrypted.
NFR-3	Reliability	The platform must be reliable and function correctly, guaranteeing the quality of freelancers and the stability of the system.
NFR-4	Performance	The application must be responsive and provide real-time updates and notifications to ensure an efficient and dynamic user experience.
NFR-5	Scalability	The architecture must be scalable to handle a growing number of users, projects, and data efficiently, as supported by its use of MongoDB.
